

Stroke doesn't just affect the body

It can change how someone feels and reacts

Swipe to know more

Slower thinking = slower replies

Not rudeness

Swipe to know more

**Lower tolerance for
stress or noise.**

Swipe to know more

More emotional sensitivity.

Tears come easily.

Swipe to know more

Or the opposite:

Flat emotions. Difficult to express feelings.

Swipe to know more

Irritability and frustration:

Often from overwhelm, not anger at
you.

Swipe to know more

Social withdrawal:

Not disinterest — just low mental energy.

Swipe to know more

Their personality didn't "Change".

Their brain is healing.

Swipe to know more

Stay patient.

Recovery also happens emotionally,
not just physically
